Education

Vellore Institute of Technology   May 2025
Bachelor of Science in Computer Science (GPA: 7.6)   *Bhopal, MP*
- **Relevant Coursework:** Programming Languages (Java), Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Computer Architecture, Software Engineering

Experience

Superteam India   Aug 2024 – Present
Member (Freelance)   *Remote*
- Joined Superteam India as a full-fledged Member, contributing to the Solana ecosystem by shipping and improving **Earn Blinks** and related community-driven projects.

Novostack   Nov 2024 – Present
Full Stack Developer   *Noida, India*
- Worked on the **Ruloans CRM Platform**, a large-scale financial ecosystem integrating DSA onboarding, expense management, MIS reporting, and invoice workflows.
- Developed and deployed multiple microservices including a **Notification Service** (Kafka-based, supporting email, SMS, WhatsApp, and push notifications) and an **Invoice Processing Microservice** with e-signing automation and database synchronization.
- Built a scalable backend engine named **Bureau Service** for **HelloTrade** (an IndiaMART group company), enabling Experian/CRIF bureau API integrations with token caching, report enrichment, and analytics generation.
- Tech stack used: **Next.js, Node.js (TypeScript), FastAPI (Python), GoLang, Kafka, Redis, PostgreSQL, AWS EC2, and Prisma ORM**.

Projects

Opinion Trading App | *Next, Node.js, Express* — **GitHub**
- Developed a opinion trading platform, allowing users to place bets on event outcomes, similar to Probo.
- Built a dynamic order book system for real-time trading, incorporating price adjustments and liquidity management.
- Implemented user authentication and order matching system to manage bet placement and result tracking.

Upchain | *React, Express, Solana, Web3.js* — **GitHub**
- Developed a decentralized job portal leveraging the Solana blockchain.
- Created a web application that connects job seekers with employers.
- Integrated blinks to post jobs through X

Label Chain | *React, Express, Solana, Web3.js* — **GitHub**
- Built a data labeling app that enables users to label data in real time.
- Provided decentralized payment functionality using the Solana blockchain.
- Integrated a secure user authentication system using public and private key pairs to enhance privacy and security.

Technical Skills

Programming Languages: Java, TypeScript, JavaScript, HTML5, CSS3
Development: React, Next.js, Node.js, Express.js, Hono, Tailwind CSS, Solana web3.js
Databases: MySQL, PostgreSQL, MongoDB
DevOps: Git, GitHub, Docker
Cloud: AWS, Cloudflare Workers, GCP

Achievements

Solana Foundation & CoinDCX India Grants: Awarded a 1,000 USDC grant for the Upchain project.

Solana Foundation & Dialect Blinks Grants: Awarded a 1,000 USDC grant for the JOBLINK.

LeetCode: Solved over 250 problems, demonstrating strong problem-solving skills.
